# EUROCAVE

# A simple, reliable range which meets the essential criteria for maturing wine:

With its simple design and original, designer control panel, the Première range catches your eye straight away!  
This maturing range guarantees a constant temperature and stable humidity levels to ensure your wines mature in optimal conditions.

# A practical understated design

- 3 sizes for optimised capacity, allowing you to store up to 223 bottles
- 2 types of doors: glass or solid, reversible to allow easy integration of your cabinet in its chosen location

V101 - Nero  
Small capacity  
100 bottles - Solid door

V166 - Nero  
Medium capacity  
158 bottles - Glass door

V266 - Nero  
Large capacity  
170 bottles - Glass door

## A range which combines **simplicity and practicality**

Thanks to their clean lines and discreet colours, cabinets in the Première range adapt to all situations and layouts. Your cabinet, equipped with a reversible glass or solid door, will fit in perfectly in its chosen location.

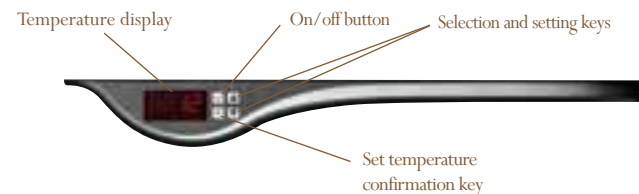

With its tried-and-tested technology and timeless profile, the Première is the ideal wine cabinet for wine lovers.

## An accessible product which benefits from all of the brand's **expertise**

Enter the world of the inventor of the wine cabinet and take advantage of over 35 years of technological innovation, achieved by the world leader in wine storage.

## A control system which is **efficient, reliable and very simple to use**

Fitted with an easy to use and accessible electronic control panel, cabinets in the Première range allow you to view and easily programme the desired temperature.

## Outstanding **flexibility!**

Arrange, store, display

Sliding shelves

Display shelves

Storage shelves

Structure in two materials to absorb vibrations and protect your bottles.

# Technical features

Ref.	Dimensions HxWxD (mm)	Weight when empty (kg) Solid door	Mixed layout capacity** Sliding and storage	Sliding layout capacity**	Maximum capacity**	Permitted temperature range External temp. min./max.	Consumption per 24hrs* (kWh)
<b>1 temperature</b>							
V-101	950x654x689	44	100	83	100	0°C/35°C	0,70
V-166	1444x654x689	64	158	143	168	0°C/35°C	0,75
V-266	1744x654x689	71	213	170	223	0°C/35°C	0,80

\* Consumption per 24 hrs measured with an external temperature of 25 °C and a solid door.

\*\* Cabinet capacities are calculated using traditional Bordeaux bottles

# Power consumption data

Model	Energy efficiency class	Annual power consumption Apc* (Kwh/yr)	Useful volume (litres)	Temperature of other compartments	Sound emission (db(A))
V-266 Solid door	C	292	447	N/A	38
V-266 Glass door	F	456	447	N/A	38
V-166 Solid door	C	274	356	N/A	38
V-166 Glass door	F	420	356	N/A	38
V-101 Solid door	C	256	224	N/A	38
V-101 Glass door	F	383	224	N/A	38

\* Power consumption calculated based on the result obtained over 24 hrs in standard test conditions (25°C). Actual power consumption depends on operating conditions and the location of the appliance. This appliance is designed solely for storing wine. – Category for all models: 2 – Climate class: Our appliances are designed to be used at an ambient temperature of 10°C - 32°C. (SN class).

## Control

**Electronic** control from 9 - 15°C

1 control dial

Internal setting

**Electronic** display

Internal display

## Equipment

Active charcoal filter

Adjustable feet

Lock

U.V. protection and thermal insulation

## Hot/cold technologies - Insulation

Production of cold air: Static cold air - Compressor – Power cords:

EC/US/UK/JA/AU/CH/CN

Production of warm air: Heater

Heat activation: Automatic – Cut-off: adjustable

Type of walls: HDF (High Density Fibre) aluminium panels

Type of external covering: Melamine panels

Type of insulation: Polyurethane foam
